Sir, The lecture delivered by Dr. Kali Shankar ji was very useful and informative related to Space Sciences, Electrical and communication Engineering in particular. Due to glitches in the Net work, the lecture would have been still more interesting and in detail. Hope our students and teachers got benefitted.

Thanks

K K Nathan, Principal Scientist, IARI, New Delhi.

Topic of the webinar was very interesting. Although speaker joined late due to technical glitches but I am sure we all had a great take away later. Congratulations to DSSTF for organizing a wonderful popular science lecture series again in 2021

virtually.
