Sir/Madam, Wonderful scientific terminologies and information delivered by Dr. Vats , DRDO. But his speedy lecture , too many slides, etc. we could not catch his sum and substance of the lecture. Also he could have focused on the title of the lecture and emphasis on the same with data etc. However, we enjoyed the same and as I very often request the executive members of the forum to have summary.

Very nicely and successfully organized this webinar session. We learnt a lot of new things for the first time during the session. I thank the technical team for organizing very nicely.

Sir, The lecture delivered by Dr. Praveen Vats ji on the topic - 'Physiological Responses During High Altitude Exposure' was very informative. Some topics like hypoxia, anorexia, role of hormones in appetite regulation during extreme environmental conditions were very interesting. The program was completed as a great success without any obstacle. Thanks to Techie Media Team Members. Regards.

R P Singh
